SYNTHETIC "ICE" RINKS, MANUFACTURED AND SUPPLIED BY VITRATHENE LTD

NEW BRAND NAME:-

www.n-ice.net

The National Ice Skating Association of the United Kingdom (NISA) is pleased to endorse VITRATHENE LTD's synthetic "n-ice" surface and recommends its use in situations and applications where ice would be impractical or simply not viable.

Over many years we have had the opportunity to obtain feedback from our members and public, as well as from professionals, and acceptance of the product is undoubted.

So much so, that we have recently included one of VITRATHENE's facilities in Southport, Merseyside as an accredited rink in our **SKATE UK** programme – allowing young skaters to reach up to level 5 before going on to complete the course on "real" ice (up to level 12).

VITRATHENE™ Synthetice® is definitely bringing skating opportunities to many areas which wouldn't otherwise have the benefits.

Benefits which include healthy exercise!

NISA hopes that, as a result of the increasing numbers of children getting started on, and continuing to enjoy VITRATHENE LTD's synthetic "n-ice" surface, a new crop of ice skating champions will emerge in the not too distant future.

Ends.

With kind regards

Yours sincerely
