

N·ICE

N-ICE Skating launched its presence in the Mexican market with a new rink of 412 square meters in Mexico City's Federal District.

In early November, our newest N-ICE team members completed the training process. They are now opened for business and ready to provide their rental and management services to the public. They will be offering the N-ICE Skating experience throughout the territory. If you're interested in renting a N-ICE rink in México, please feel free to contact contact us.
